

# How to check course grades on ANGEL?

Updated on June 5, 2009

1. Enter the course and click on the **Report** tab;
2. Select **Grades** from the Category's dropdown menu;
3. Click on **Run**, and the grades already entered by your instructor will be displayed in the blank area below.

The screenshot displays the ANGEL Reports Console interface. At the top, a navigation bar includes tabs for Syllabus, Calendar, Lessons, Resources, Communicate, and **Report** (highlighted with a red box and a red '1'). Below the navigation bar, the breadcrumb trail reads 'Home > Course > Reports Console'. On the right side, there is a user profile indicator for 'Student'. The main content area is titled 'Reports Console' and contains a 'Report Settings' section with a 'Saved Reports' tab. Under 'Choose Report', the 'Category' dropdown is set to 'Grades' (highlighted with a red box and a red '2'), the 'Report' dropdown is set to 'Student Grades', and the 'User(s)' dropdown is set to 'Dunsworth, Qi ("Chee")'. Below this, there is a 'Configure Report' section with a 'Select report view' dropdown set to 'Page Link'. At the bottom right of the configuration area, the 'Run' button is highlighted with a red box and a red '3', next to a 'Save' button. A '[-] Collapse' link is also visible on the right side of the configuration area.
